# Organisation Climate Campus

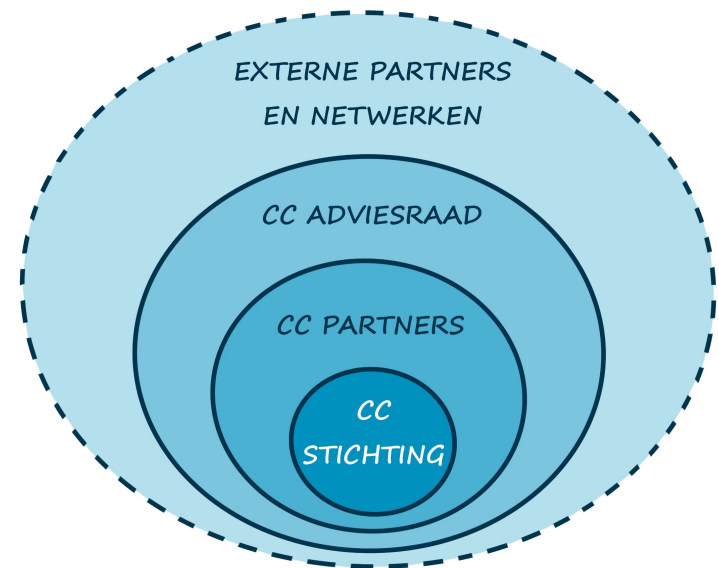

Climate Campus Foundation supports the network of organisations in collaborating for a climate and economically resilient and confident delta. The foundation consists of a Board and a Bureau.

The foundation's Board is responsible for formal affairs, policy and decisions and represents Climate Campus.

The Bureau develops action plans with activities and budget plans and is responsible for their execution and fundraising. The action plans are based upon the needs of the partner organisations in the network and the activities necessary for further developing Climate Campus.

The foundation's Board seeks advice from an Advisory Board that consists of representatives from a broad variety of public institutions. The Advisory Board has no formal responsibilities.

The Climate Campus network collaborates with external partner organisations and networks. As such every active member participating within the network (Board, Bureau, network members and Advisory Board) is an important link.
